## One Life Photos 2011

What do you think the people behind the face that usually offer the view of others? How they feel behind the face, behind a polite smile? What's in a thoughtful gaze?

The facial appearance is often the media, a portrait of summary, synthesis and at the same time incomplete picture of our being in constant motion. The face of a person most often hides an inner dialogue, absorbs large and small dramas, mitigate some wavering, conceals or simple running thoughts or dreams, even mixed.

The soul of every individual, while it expands and multiplies as appropriate and racing thoughts, indecision and hesitation between the thesis, questions and no answers, fears or desires, moods or care visions, creating a harmony or a disharmony of facets indistinguishable.
